

SUCHETANA DAS

+1-945-244-6043 ◊ San Jose, CA ◊ suchetanad@smu.edu ◊ <https://www.linkedin.com/in/suchetana-das/>

PROFILE

Economics Ph.D. candidate specializing in applied microeconomics, causal inference, and policy evaluation. Experienced in analyzing large-scale administrative and survey data using quasi-experimental methods and statistical programming in Python, SQL, and Stata. Prior industry experience in banking analytics and business consulting.

EDUCATION

Ph.D. in Economics , Southern Methodist University	Dallas, Texas Expected 2027
Master of Science, Economics , Presidency University	Kolkata, India 2020
Bachelor of Science, Economics , Presidency University	Kolkata, India 2018

RESEARCH

Misplaced at Home? A Partial Observability Approach to Foster Care Placement Decisions (*Suchetana Das – Job Market Paper*)

- Analyzed nationally representative longitudinal survey data on Child Protective Services investigations.
- Developed a partial observability bivariate probit model to jointly estimate latent maltreatment risk and caseworker placement decisions.
- Estimated the effects of latent maltreatment risk and misplacement at home on subsequent educational outcomes.

Unaccompanied Migrant Youth and Child Labor Violations: Accounting for Nonclassical Measurement Error (*with Daniel Millimet – ongoing*)

- Built a U.S. county-year panel dataset integrating multiple federal administrative and survey data sources.
- Implemented a measurement-error-robust estimation method to correct for systematic underreporting in administrative enforcement data.
- Estimated the causal impact of unaccompanied migrant child inflows on federal child labor law violations using stochastic frontier analysis, instrumental variables, and two-way fixed effects.

Gendered Occupational Segregation and Its Cost in India (*with coauthors – published*)

- Constructed occupational segregation indices from nationally representative NSSO employment data.
- Estimated multinomial logit models of occupational choice and documented rising gender-based segregation across Indian states with persistent welfare losses.

EXPERIENCE

Southern Methodist University	Aug 2022 – Present
Teaching & Research Assistant	Dallas, TX

- Teaching Assistant for graduate Econometrics and undergraduate Microeconomics courses, providing instructional support, grading, and office hours.
- Research Assistant: Conducted validation exercises to verify the robustness of empirical results and streamlined research code in Python and Stata to improve reproducibility and computational efficiency.

HSBC	Aug 2020 – Jun 2022
Business Analyst	Kolkata, India

- Analyzed transaction-level payment data to identify high-value business opportunities and support data-driven client targeting.
- Developed a Python-based entity resolution algorithm using fuzzy string matching to link client records across internal databases.
- Built automated dashboards to monitor product performance, pricing, and revenue trends across client segments, providing actionable insights for stakeholders.

SKILLS

Tools:	Python, Stata, SQL, Git
Methods:	Causal inference, difference-in-differences, instrumental variables, regression discontinuity, maximum likelihood estimation, panel data methods.
Research Areas:	Applied microeconomics, labor and demographic economics, policy evaluation.

CONFERENCE PRESENTATIONS

- International Conference on Empirical Economics (ICEE), August 2026
- Midwest Econometrics Group Annual Meeting (MEG), October 2026
- AEA-CSMGEP, Allied Social Science Associations (ASSA) Annual Meeting, January 2027 (Upcoming)

FELLOWSHIP AND AWARDS

- George W. Bush Institute Doctoral Fellowship (full 5-year funding)
- SMU Provost's Summer Research Fellowship 2025
